PROFESSIONAL SUMMARY

Full Stack Developer and final-year B.Tech Computer Science student with experience building web platforms, backend systems, cloud solutions, and cybersecurity applications. Skilled in Python, C++, Java, React/Next.js, FastAPI, Django, and AWS, with hands-on experience in software development, databases, cloud security, and applied cryptography.

WORK EXPERIENCE

Full Stack Developer Intern | IME (Integrated Maritime Exchange) Oct 2025 to Nov 2025

- Developed maritime workflow tools integrating REST APIs, backend services, and responsive frontend interfaces.
- Implemented automation logic for cost estimation and reporting systems used in internal negotiation workflows.
- Contributed to modular full stack backend components in Python and FastAPI, enhancing data processing efficiency.

Operations Intern | TBI-GEU, Dehradun Mar 2025 to Sept 2026

- Coordinated operational workflows and technical documentation for 40+ entrepreneurship and innovation programs.
- Supported 105+ incubated startups with technical planning, budgeting, and outreach initiatives.
- Managed logistics, resource allocation, and student teams during campus innovation events and workshops.

PROJECTS

SHADE: Explainable Intrusion Detection System Python, PyTorch, XGBoost, SHAP, Streamlit

- Developed an explainable zero-day intrusion detection system evaluating 250,000+ network flows across UNSW-NB15 and CIC-IDS2017 datasets under a leave-one-family-out benchmark protocol.
- Trained PyTorch Autoencoders and XGBoost classifiers integrated with SHAP (Shapley Additive exPlanations) for per-alert feature attribution and feature ablation analysis.
- Built an interactive Streamlit analytics dashboard for real-time traffic monitoring and alert visualization, demonstrating robust generalization to unseen threat families.

ArgonVault: Zero-Knowledge Encrypted Cloud Storage FastAPI, Next.js 15, AWS S3, WebCrypto, Python

- Architected a zero-knowledge cloud file storage platform where encryption keys never leave the client browser, enforcing end-to-end metadata and payload protection via AES-256-GCM.
- Implemented Argon2id password key derivation (KDF) using WebCrypto API on a Next.js 15 frontend backed by a Python FastAPI server.
- Engineered direct browser-to-AWS S3 file transfers using presigned URLs, eliminating API bandwidth bottlenecks while maintaining strict zero-knowledge security guarantees.

CaseHarbor: Multi-Role Case Management System Django 5, PostgreSQL, Bootstrap 5, GitHub Actions

- Designed a full stack legal operations platform using Django 5 and PostgreSQL featuring a 3-tier Role-Based Access Control system for Clients, Lawyers, and Administrators.
- Enforced strict access control at the database query level (ORM/SQL filters), preventing unauthorized record access across user roles rather than relying solely on UI masking.
- Built an automated test suite integrated with GitHub Actions CI/CD workflows for continuous delivery and deployed the production application live on Render.

EDUCATION

B.Tech in Computer Science & Engineering, Graphic Era Hill University, Dehradun 2023 to 2027

Class 12 (ISC), Seventh Day Adventist Senior Secondary School 2022

SKILLS

Programming Languages: Python, C, C++, Java, SQL

Full Stack & Web: Django, FastAPI, Next.js, React, REST APIs, HTML5/CSS3, JavaScript

Cloud & Databases: AWS (S3, Cloud Fundamentals), PostgreSQL, InfluxDB, Relational Database Design

Tools & DevOps: Git, GitHub Actions, Docker, Linux, Raylib, Streamlit

Core Concepts: Data Structures & Algorithms, Object-Oriented Programming (OOP), System Design, Cybersecurity Fundamentals

CERTIFICATIONS

AWS Cloud Practitioner | AWS AI Practitioner | AWS Essentials of Prompt Engineering | AWS Security, Compliance & Governance for AI | Information Security (Infosys Springboard) | Career Essentials in Cybersecurity (Microsoft) | Cloud Computing (EC-Council)

ACHIEVEMENTS & LEADERSHIP

- Finalist** among 80+ teams at Hack for Impact, IIIT Delhi.
- NSS GEHU | Content Cell Head (2025):** Led content strategy and editorial operations for campus drives.
- IEEE SB GEHU | Events Lead:** Organized technical workshops, seminars, and coding conferences.
- Literary Society Head:** Seventh Day Adventist Senior Secondary School.
